The three Liquefied Natural Gas terminals and pipelines planned for Oregon would devastate Oregon's rivers, farms and forests. Annually they would emit as much greenhouses gasses as 11 million cars.

Learn more about these projects, how they threaten renewable energy, and how we are going to stop them!

Please join **Oregon Sec. of State Bill Bradbury**, Oregon's leading advocate working to fight global warming, and lead activists, farmers and others working to protect Oregon and Washington from LNG.
